

Operate the opening using a rocker switch mounted to your wall,  
or upgrade to a remote control which comes with a free rain sensor.

Contact our sales team, pop into our Leicester showroom or go online for a quote.  
We also offer factory tours if you would like to see and experience our handcrafted manufacturing process directly.

IDEAS TO TRANSFORM YOUR HOME  
CONSERVATION LUXLITE™

## CONSERVATION LUXLITE™

Maintain the heritage feel of character properties and barn conversions, whilst benefiting from the very latest technological advances, such as easy clean glass and superior triple glazed thermal performance.

Designed to replicate the original Victorian cast iron skylight with a modern edge, the slim aluminium split bar is structurally bonded to the surface of the glass - preventing dirt from accumulating underneath.

## ELECTRIC OPENING

Ventilate your room by opting for the electric hinged-opening version, providing fresh air for thermal regulation and to help disperse steam and cooking smells.
